## Lightweight Airborne Model M14/M1A Steel Scope Mount

**Sadlak Steel Scope Mount  
Airborne Model  
9 oz (with Hardware)**

**As Supplied to 101st Airborne**

**Sadlak Steel Airborne Model  
Scope Mount 9.0 oz**

**\$295**

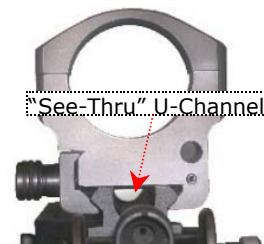

- 20% Lighter than our standard steel mount
- Precision Mil-Spec Picatinny Rail and see-thru U-Channel for Iron sight use with scope/rings attached.
- Rail Hardened to 45-50 Rc for a tough and strong mounting platform.
- Manufactured from solid Chrome-Moly Steel bar. Not Investment Cast
- 5 degree Case Deflector angle milled on the underside of Rail.
- Proven Brookfield-type 3-point contact Design. The best type for the M14 Rifle to prevent loosening.
- Mil. Spec. Manganese phosphate finish (a.k.a. Parkerizing)
- Includes all mounting hardware, fasteners, and hex wrenches and detailed instructions

### How this new model came to be...

It was inspired by the Brookfield Precision Tool special production run of light weight steel mounts for the special-forces in the 1980's. We had been loaned an original Brookfield Light-weight mount several weeks before the 101<sup>st</sup> Airborne called expressing their interest in a lighter steel mount. We had the interest and now they had an urgent need so we rose to the challenge to expedite it since their unit was about to deploy in a few weeks and we didn't want to let our brave troops down.

We did our initial design overnight and had the first prototypes for heat-treat and testing in 2 days. We were cautious in where and how much material to remove to avoid compromising the over-all strength of the new light-weight mount. After many design revisions and prototypes and a few 18hr work days, we had the right balance and production began. Mike Sadlak and his dedicated precision tool-makers worked tirelessly through many nights to deliver the finished mounts to the 101<sup>st</sup> Airborne on time.

It was a proud day for the employees at Sadlak Industries LLC. We thank the 101<sup>st</sup> and our military for the opportunity to serve them for a change!

**Using Iron Sights with a Sadlak Scope Mount**  
Similar to the original Brookfield Precision Tool mount, the Sadlak mount also has a U-shaped channel thru the precision machined Picatinny rail that provides an opening under the rings to use the iron sights with the scope and rings attached.
