M14 Tactical Magazine Release Latch

Developed by Sadlak Industries LLC and John Bourguignon

MODEL: JB1

P/N: 140040

The Tactical Magazine Release Latch is manufactured to original USGI specification with the exception of the thumb pad which has been enlarged and serrated to provide a faster, smoother release, and a more positive grip.

The Case hardened steel has a hardness of 55 Rc and a Mil-Spec parkerized finish

MODEL: JB1

The vertical serrated grooves in the tab are machined in the direction the thumb travels allowing a firm grip that results in quick magazine changes what are helpful during the rapid portion of competition matches and other tactical operations.

The ergonomic design of the rounded edges assure comfortable use.

Sadlak's Tactical Magazine Release Latch with thumb tab approximately 2-1/2 times larger than standard USGI
